January

- January 20 – DeepSeek releases DeepSeek-R1, a large language model based on DeepSeek-V3 utilising a chain-of-thought, stating it achieves performance comparable to OpenAI-o1 across math, code, and reasoning tasks.[1] DeepSeek-R1 is open-source.

- January 21 – The Stargate Project, a joint venture created by OpenAI, SoftBank, Oracle and MGX, is formally announced by U.S. president Donald Trump.[2][3]

- January 23 – Humanity's Last Exam, a benchmark for large language models, is published. The dataset consists of 3,000 challenging questions across over a hundred subjects.[4]

- January 27

  - Nvidia's stock falls by as much as 17–18%, after the release of DeepSeek-R1.[5]
  - DeepSeek-R1 surpasses ChatGPT as the most-downloaded free app on the iOS App Store in the United States.[6]

February

- February 3 – OpenAI releases ChatGPT Deep Research, an artificial intelligence system integrated into ChatGPT,[7] which generates cited reports on a user-specified topic by autonomously browsing the web for 5 to 30 minutes.[8]

- February 6 – Mistral AI releases Le Chat, an AI assistant able to answer up to 1,000 words per second.[9]

- February 10

  - AI Action Summit takes place in Paris, France, for two days.
  - It is announced that France will receive 109 billion euros in AI private investments over the coming years.[10]
  - Anthropic launches the Anthropic Economic Index, an initiative aimed at "understanding AI's effects on labor markets and the economy over time".[11]
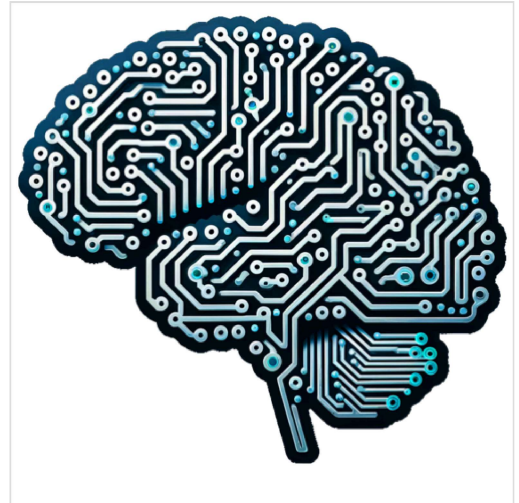

- **Elon Musk** and a group of investors led by him offer to buy OpenAI for $97.4 billion.[12]

- February 27 – OpenAI announces a research preview of GPT-4.5, its largest and most advanced AI model to date.[13]

April

- 16 April – OpenAI announces the launch of two new AI models, o3 and o4-mini.[14]

May

- 14 May – Google DeepMind announces AlphaEvolve, a Gemini-powered coding agent for designing advanced algorithms.[15]

- 20 May

  - Google launches A.I. Mode, which will be a feature on their search engine, and uses the Gemini model.[16]
  - Google DeepMind announces Veo 3, a new state-of-the-art video generation model.[17] The company also boosts the performance of Gemini 2.5 Pro, its flagship AI model.[18]

- 22 May – Anthropic releases Claude 4, with two models: Claude Opus 4 and Claude Sonnet 4. According to Anthropic, Claude 4 can function on its own for hours.[19]

31 March: OpenAI's latest model GPT-4.5 is reported to be indistinguishable from a human in text conversations.

20 May: Google DeepMind sets a new benchmark for AI video generation with its Veo 3 model.
